Description

One of the employees at your company has their computer infected by malware! Turns out every time they try to switch on the computer, it shuts down right after they log in. The story given by the employee is as follows:

1. They installed software using an installer they downloaded online
2. They ran the installed software but it seemed to do nothing
3. Now every time they bootup and login to their computer, a black command prompt screen quickly opens and closes and their computer shuts down instantly.

See if you can find evidence for the each of these events and retrieve the flag (split into 3 pieces) from the correct logs!

Download the Windows Log file [here](#)

Pada kasus ketiga kita diberikan sebuah cerita bahwa ada karyawan yang mendownload file dan kemudian pcnya muncul command prompt dan langsung mati. Disini kami diminta untuk mencari flag yang terbagi menjadi 3 bagian berbeda. Setelah kita buka, ternyata pada bagian event id terdapat beberapa kode yang dimana menggambarkan peristiwa yang terjadi.

1033 = install

4657 = registry event

1074 = shutdown

Jadi kita bisa mencoba menelusuri log dengan event id berikut untuk mencari flagnya.

Setelah dicek satu persatu muncul tulisan yang terlihat aneh

Event 1033, MsiInstaller

General

Details

Windows Installer installed the product. Product Name: Totally_Legit_Software. Product Version: 1.3.3.7. Product Language: 0. Manufacturer: cGjtk0NURntFdjNudF92aTN3djNyXW==. Installation success or error status: 0.

Tulisan ini terlihat seperti dienkrpsi dengan base64 karena diakhiri dengan simbol “=” dan hanya terdiri dari a-z, A-Z, 0-9, /, =.

Setelah itu pada event id 4657 juga terdapat string yang seperti diencrypt oleh base64
